THEME: Spatial planning and Governance

Case Study – Mar Menor (Spain)

Lloret J., Bello C., Velasco J., Marín A.

Department of Ecology and Hidrology, University of Murcia, Campus de Espinardo, 30100 Murcia, Spain

Spatial Concepts (WFD)

According to the Water Framework Directive the following water bodies can be identified in the Mar Menor region: territorial waters, coastal waters and transitional waters.

Spatial Planning and Management Tools

At National level we have the national coastline plans. At **Regional** level we have the Regional Land Use Plans and Sectorial Plans that define the regional strategy for territorial development and the Protected Areas Land Use and Management Plans (PORN). At **Municipal** level we have Municipal Urban Plans (PGOU), which are regulatory instruments that establish the land use regime of the municipalities.

The research leading to these results has received funding from the European Community's Seventh Framework Programme FP7/2007-2013 under grant agreement n°283157
